### A strong team celebrates a milestone!

We are a traditional company based in Schwenningen that has produced small precision springs of the highest quality since 1954. Our tiny champions work unseen in the background, giving a wide variety of products their actual mechanical function.

### Isn't one gram of material a negligible amount?

Not for the highly qualified employees at **MEDER**. Our experienced team can produce an incredible number of springs from just one gram of material. Do you know how many? You can find the answer in our anniversary mailing, coming soon.

A small quiz

# Thank you

for 60 years of trust in our team and our products!
